

**Dual Controls for Driving Instructors**

Abiliquip installs dual controls to your requirements. These are required to safely take trainees on the road in real traffic situations where the instructor may need to take control.

- 2 or 3 pedal solutions
- Quality TUV registered design
- Low added resistance to driver pedals
- Replicated electrics for:
  - Indicators
  - Starter
  - Motor kill
  - Speedo

*For testing or training disabled drivers, we can fit:*

- Spinners
- Left foot accelerators
- Hand controls

Kill and start switch

Other changes you may find useful

- Seat position alteration for small cars / tall drivers
- Power seat adjust
- Reversing sensors
- Cruise control
- Grab handles

3-way dual pedals

Replicated indicators

Call for any special modifications to your car !

**Contact Details**
